

## **Security Management (BS) Learning Goals**

1. To critique and evaluate the origins and current structure of security management within corporations, not-for-profit institutions, and the government.
2. To discern and differentiate concepts of situational crime prevention, rational choice theory, and criminological tenets to understanding crime and to evolving counter measures for the control of loss and disorder.
3. To weigh and assess common areas of occupational proficiency for security executives: data protection, emergency planning and response, homeland defense, and legal liability.
4. Discover and apply tools to be effective in achieving those goals, particularly in areas where current practices are deficient, such as information protection, security technology, legal justice, and safety services.
5. Develop, support, and enhance writing and verbal communications skills through relevant classroom assignments.
